### **DETAILED ACTION**

**The previous restriction is vacated in view of the one set forth below. A new restriction is needed since claims were left out of the first rejection.**

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 6-8, 11-16, drawn broadly to the composition and to a paper product (claims 8 and 16).

Group II, claim(s) 5, drawn to a method.

Group III, claim(s) 1, 9, 10, 17-20 drawn to a food composition.

Claim 1 is a linking claim and can be examined with either Group I or III.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is to a mineral complex. Group II is to a method of making the mineral complex, not required by Group I. Group III is to a food compound where the food is not required by the composition of group I or the method of Group II. .

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Claim 15 is to a resin for film, the resin for claims 8 and 16 is for paper.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claim 15 is to a resin for film, the resin for claim 16 is for paper.

The following claim(s) are generic: 1, 2, 3, 5

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: resins as in claim 15 for film, is a different product than a resin for paper.

A telephone call was not made to request an oral election to the above restriction requirement, because the restriction was too complicated.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
